

Amendments to the claims

Claims 1-59 (canceled).

60. (currently amended) A system for use in a vehicle for receiving entertainment programs in a vehicle from one or more sources remote from the vehicle, comprising:

a receiver for receiving, from ~~sources remote from~~ outside the vehicle, one or more signals containing data concerning categories in which the entertainment programs are classified based on contents thereof; and

a display for presenting thereon at least one category, together with a collection of one or more indicators in association with the at least one category, wherein the one or more indicators represent the one or more ~~of the~~ remote sources currently providing the entertainment programs receivable by the receiver, and the association is determined based on the data, thereby facilitating selection of a remote source represented by an indicator in the collection to receive an entertainment program, which is classified in the at least one category and currently provided by the remote source.

61. (previously presented) The system of claim 60 wherein at least one of the remote sources is a radio station.

62. (previously presented) The system of claim 60 wherein at least one of the remote sources is a television (TV) source.

63. (previously presented) The system of claim 60 wherein at least one of the remote sources is an audio source.

Serial No. 09/923,125

64. (previously presented) The system of claim 60 wherein at least one of the remote sources is a video source.

65. (previously presented) The system of claim 60 wherein at least one of the remote sources provides weather information.

66. (previously presented) The system of claim 60 wherein one of the categories includes news.

67. (previously presented) The system of claim 60 wherein one of the categories includes a type of music.

68. (previously presented) The system of claim 60 wherein the indicator includes a sign identifying the remote source represented thereby.

69. (previously presented) The system of claim 60 wherein the remote source is selected by selecting, on the display, the indicator representing the remote source.

Claims 70-79 (cancelled).

80. (currently amended) A method for use in a system in a vehicle for receiving entertainment programs from one or more sources remote from the vehicle, the system including a receiver and a display, the method comprising:

receiving, from ~~sources remote from~~ outside the vehicle, one or more signals containing data concerning categories in which the entertainment programs are classified based on contents thereof; and

presenting, on the display, at least one category, together with a collection of one or more indicators in association with the at least one category, wherein the one or more indicators represent the one or more ~~of the~~ remote sources currently providing the entertainment programs receivable by the receiver, and the association is determined based on the data, thereby facilitating selection of a remote source represented by an indicator in the collection to receive an entertainment program, which is classified in the at least one category and currently provided by the remote source.

81. (previously presented) The method of claim 80 wherein at least one of the remote sources is a radio station.

82. (previously presented) The method of claim 80 wherein at least one of the remote sources is a TV source.

83. (previously presented) The method of claim 80 wherein at least one of the remote sources is an audio source.

84. (previously presented) The method of claim 80 wherein at least one of the remote sources is a video source.

85. (previously presented) The method of claim 80 wherein at least one of the remote sources provides weather information.

86. (previously presented) The method of claim 80 wherein one of the categories includes news.

Serial No. 09/923,125

87. (previously presented) The method of claim 80 wherein one of the categories includes a type of music.

88. (previously presented) The method of claim 80 wherein the indicator includes a sign identifying the remote source represented thereby.

89. (previously presented) The method of claim 80 wherein the remote source is selected by selecting, on the display, the indicator representing the remote source.

Claims 90-98 (cancelled).
